Top Performing States by Revenue

- Revenue is flat, not growing — $14M–$17M monthly for 4 years (2020–2023) with no upward trend despite 550K transactions.
- Central region dominates — $221M vs West's $162M, a $59M gap. Biggest untapped growth opportunity in the dashboard.
- High AOV of $1,390 — only 1,000 unique customers generating $764M suggests heavy repeat buying or B2B behavior, not typical retail.
- Store types are evenly split — Convenience & Department (~25% each) lead, but Specialty Store at 5.77% is the clear underperformer worth investigating.
